Github: <https://github.com/ananya2236>

Summary

- Software Developer skilled in building scalable end-to-end web applications and AI-powered systems using React.js, Node.js, Python, FastAPI, MongoDB, and modern AI frameworks.
- Experienced in developing real-time applications, multilingual AI solutions, REST APIs, workflow automation, and low-latency architectures.
- Strong foundation in Data Structures & Algorithms, OOP, DBMS, Computer Networks, and system design with a passion for creating production-ready software solutions.

Education

Degree	Institute	CGPA / Percentage	Year
B.Tech Computer Science Engineering (Artificial Intelligence)	Jain (Deemed-to-be) University, Bengaluru	8.9 / 10 (Current)	2023 – 2027
Higher Secondary	PM Shri Kendriya Vidyalaya No. II, Port Blair	7.7 / 10	2023
Secondary	PM Shri Kendriya Vidyalaya No. I, Vasco da Gama, Goa	9.0 / 10	2021

Experience

Software Developer Intern, Spinobot [Experience Letter](#) March 2026-May 2026

- Developing scalable AI-powered and full-stack applications using React.js, Node.js, FastAPI, Convex, MongoDB, and WebSockets with deployment-ready and responsive architectures.
- Building and integrating REST APIs, authentication systems, webhooks, and asynchronous backend services to enable secure, low-latency, and real-time automation workflows.
- Collaborating on intelligent automation systems, cloud-deployed services, reusable frontend components, and agile development workflows involving debugging, optimization, Git/GitHub, and production-level performance enhancement.

Skills

Programming Languages: Python , Java , JavaScript, HTML, CSS

Frameworks & Technologies: React.js, Node.js, Tailwind CSS

Databases: MySQL, MongoDB, Convex

Machine Learning & AI: NLP, LLMs, Transformers, Retrieval-Augmented Generation (RAG), Speech-to-Text (STT), Text-to-Speech (TTS), Convolutional Neural Networks (CNN)

Python Libraries: NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, OpenCV, NLTK

UI/UX Design: Figma, Canva, Prototyping, Interaction Design

Tools & Platforms: Git, GitHub, VS Code, Google Colab

Cloud & DevOps: REST APIs, GitHub Actions, Deployment Pipelines

Core Subjects: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

Projects

1. AI Voice Agent Developer – Anyra (30-Day Murf AI Challenge) November 2025

[GitHub](#) | [Live Link](#)

- Developed real-time AI voice agent using FastAPI, WebSockets, AssemblyAI STT, Gemini LLM, and Murf AI TTS with low-latency audio streaming and intelligent conversational workflows.
- Engineered asynchronous backend processing, session memory handling, and deployment-ready architecture for scalable real-time voice interaction systems.

2. AI Developer – TranNexa (AI-Powered Multi-Language Translator) September 2025

[GitHub](#) | [Live Link](#)

- Engineered real-time multilingual AI translation system using Python, STT, NMT, and TTS pipelines supporting 10+ languages with high-accuracy speech processing.
- Optimized asynchronous processing and scalable backend architecture achieving low-latency translation performance and efficient real-time audio-stream handling.

3. Ratna Jewellery – Modern E-Commerce Platform August 2025

[GitHub](#) | [Live Link](#)

- Developing full-stack jewellery e-commerce platform with secure authentication, responsive UI, real-time inventory management, and scalable backend architecture.
- Implementing personalized recommendation systems, optimized database operations, and deployment-ready workflows with mobile-first user experience enhancements.

4. GlobeVista – Experience Reality on Your Device March 2025

[GitHub](#) | [Live Link](#)

- Designing interactive virtual travel platform featuring immersive 3D tours, AR/VR exploration, geolocation services, and dynamic travel recommendation systems.
- Integrating Mapbox APIs, responsive frontend architecture, and scalable real-time functionalities to deliver multilingual and user-centric travel experiences.

Activities & Achievements

- Awarded Gold Medal at INNOVERSE'25 for developing an AI-powered real-time multilingual translation platform with scalable speech-processing architecture.
- Selected for IEEE ICCCNT 2025 research presentation for innovative work in AI, real-time language translation, and intelligent communication systems.
- Designed, and deployed multiple AI-driven and full-stack applications focusing on real-time processing, responsive architecture, and modern system design principles.

Certifications

Generative AI Studio – Google Cloud & Simplilearn SkillUp [link]	July 2025
Data Analytics Job Simulation – Deloitte (Forage) [link]	July 2025
HTML, CSS, and JavaScript for Web Developers – Johns Hopkins University (Coursera) [link]	Sep 2024
